

MOHAMMAD SIDDIQULLAH

Buffalo, NY | 929-742-2161 | msiddiiq48@gmail.com | linkedin.com/in/mohammad-siddiqullah | U.S. Citizen

PROFESSIONAL PROFILE

Quantitative and technology-focused professional with a B.S. in Applied Mathematics and Statistics and hands-on project experience in Java, Python, R, SAS, and SQL. Combines rigorous mathematical training with operational data, inventory, and logistics experience across large-scale retail and fulfillment environments. Targeting software engineering, application development, data engineering, and analytical technology roles.

TECHNICAL CAPABILITIES

Programming & Analytics	Java, Python, R, SAS, SQL
Data & Reporting	Relational databases, data pipelines, data visualization, dashboard reporting
Quantitative Foundation	Applied statistics, discrete mathematics, linear algebra, calculus, differential equations, physics and chemistry for engineers and medical doctors
Productivity Tools	MATLAB, Microsoft Excel, Word, PowerPoint

SELECTED TECHNICAL PROJECTS

Company Employee Dashboard | Python

- Developed a dashboard for a simulated organization of 10,000 employees, displaying names, positions, salaries, addresses, tenure, and reporting relationships.

Company Relational Database | SQL

- Designed a five-table relational database covering company, employee, customer, product, and order information, with relationships supporting cross-table queries and business analysis.

Country Information Lookup Tool | Java

- Built an application that accepts a country name and returns capital name, current population, state language(s), currency, GDP, total wealth, wealth status (upper, middle, or low) through input handling and lookup logic.

PROFESSIONAL EXPERIENCE

Family Dollar | Sales Associate - Data & Inventory Operations

May 2026 - Present

- Track and reconcile inventory, identify shrinkage, restocking needs, and slow-moving items, and support weekly ordering decisions while managing inbound freight and customer-facing operations.

Walmart | Top Stock Associate - Inventory Data Analysis

Jul 2025 - Jan 2026

- Analyzed stock levels and sales patterns to prioritize replenishment and reduce out-of-stock incidents; recognized for accuracy and consistency in replenishment and cycle counts.

Amazon | FC Associate I - Inventory Data Analysis

Oct 2022 - Mar 2025

- Processed and tracked high-volume freight, monitored throughput and inventory accuracy, used productivity data to flag workflow bottlenecks, and trained peers on operational processes.

EDUCATION & ADDITIONAL EXPERIENCE

Stony Brook University

College of Engineering & Applied Sciences | Stony Brook, NY

B.S., Applied Mathematics and Statistics

Leadership & Recognition

Vice President, Mathematics & Computer Science Club - Queensborough Community College, CUNY; Certificate of Recognition for Service to the Department; Certified in Martial Arts.

Additional Experience

Adjunct Lecturer (2 yrs); Freight Agent - U.S. Customs, JFK Airport (14 months); Assistant Project Manager for Consulting Engineering (15 months); Security Officer (1 yr); Self-Employed Business Partner (7 yrs).
